Expected Impacts

Temperatures: Will fall to near freezing by late afternoon across north central Kentucky...producing a potential wet heavy snow. Finally temperatures will fall towards freezing by near midnight near Lake Cumberland.

Road Impacts: Snow will accumulate on roadways by late this afternoon or evening. Roads will become slick and hazardous by late evening.

Additional Info: Rain is expected to fall for a period of time with temperatures below freezing across south central and east central Kentucky tonight. Ice accumulations from freezing rain are NOT anticipated to cause an impact to antecedent warm ground lagging behind air temperatures.

This storm has been highly unpredictable. Stay on top of latest forecast updates for possible changes.
